SAGOLA®
an Elcometer company

AUTOMOTIVE REFINISHING AND INDUSTRIAL BODYSHOP
PROFESSIONAL EQUIPMENT
2024/25

For more than **70 years** we have worked hard to be the best at what we do, so you can be the best at what you do.

Since 1955

SAGOLA can trace its origins to the year 1955 and is fruit of the pioneering spirit of its founder, **Alejandro Sánchez Larrauri**.

It began as a small subcontracting workshop for industry. After some years in the subcontracting sector, Larrauri felt the need to manufacture his own product and progressively withdrew from subcontracted activity.

International expansion

Due once again to the entrepreneurial spirit of the SAGOLA team, the need was felt to open the company to the international market. For that reason the Company began operating in related markets such as Latin America, where it soon became the indisputable leader, later expanding to Arab countries, Asia and finally Europe. Today, SAGOLA is present in more than 80 countries worldwide.

SAGOLA has maintained the highest quality standards in the manufacture of its products from its very beginnings, which has contributed to becoming a very important competitor in sectors such as bodyshop and industry.

Elcometer Group

In 2020, SAGOLA has became part of a much larger business group. The ELCOMETER Group. Headquartered in the UK, Elcometer is also a family business and has been owned by the Sellars family for seven generations. Beginning in the 19th century as a chemical company, Elcometer, headquartered in Manchester, UK, has grown into one of the world's leaders in the design, manufacture and supply of equipment for the coating and non-destructive testing industries (END).

Elcometer exports more than 90% of the products it manufactures through its offices in France, Germany, Japan, the Netherlands, Singapore, the United Arab Emirates and the USA and its global distribution network that covers more than 170 countries throughout the world.

Like Sagola, the philosophy of the Elcometer company is to integrate quality into all aspects of the products they design and manufacture, while being very aware of the environment that surrounds us. Elcometer's commitment is reflected in its ISO 9001 and 14001 Quality and Environmental accreditations.

www.sagola.com

Evolution and Innovation

Since our beginnings, SAGOLA has always maintained the highest quality standards in its products and production processes, facilitating the most demanding coating processes.

All of this has made SAGOLA what it is today, a company and a brand recognised not only in the domestic market, but in more than 80 countries worldwide.

We have 70 years of experience as manufacturers of spray guns and spraying equipment

After 70 years making and developing new products, we are convinced of the need to establish a close relation with our clients on a day-to-day basis.

We know that the best product is based on the proper development of what is demanded by the market at each moment in time. For that reason we constantly reinforce our training and sales and marketing personnel, which is in permanent contact with the market and its needs all over the world.

The quality of our products is acknowledged in more than eighty countries. SAGOLA has a vast experience and owns know-how in the manufacture of professional coating systems.
Human resources

SAGOLA is a worldwide benchmark brand thanks to the highly qualified professionals in our team. Notwithstanding, this team continues to work towards the objective of consolidating the SAGOLA brand as the industry yardstick.

Strengthening our human resources is SAGOLA's principal objective

Since its inception, SAGOLA has been characterized by merging manufacturing technologies, production means and manufacturing processes with a highly qualified human team.

The **high technical level** of our production guarantees the **high quality** of our products.

Research and Development

Our commitment to R+D is absolutely clear. We devote all our efforts in this department to assuring that our products are adapted to the needs of the market.

Our objective is that between both parties and the innovations generated at our headquarters, clients will regard SAGOLA as a safe bet and stay loyal to a brand which researches on a day-to-day basis to develop products which answer their needs.

Optimisation and Self-improvement

When it comes to service we are talking about a deeply rooted culture arising from the history of SAGOLA, to which service is vital.

The robotic automation of all our warehouses is an example, a major investment which gives us and advantage over the competition when it comes to offering a fast, reliable response which the market appreciates.

The quality as a brand

If the SAGOLA brand plays an important role on the market after 67 years of history, this is due to the emphasis placed on QUALITY.

At our factory in Vitoria (Spain), each department you visit is steeped in an atmosphere of quality.

At the beginning the founder, Alejandro Sánchez, was able to transmit this vital concept and 67 years later his heritage on this point remains as vital as on the first day.
Warranty

SAGOLA provides a 3-year guarantee with the main products.

We know this is the best way of showing our customers that we believe in our products and that our guarantee will make our past and present customers loyal in the future.

www.sagola.com

SAGOLA
an Elcometer company

From its very beginnings SAGOLA has showed marked interest in advances related to care of and **respect** for the **environment**.

Environment

Since the very first developments regarding VOC emissions to the atmosphere, SAGOLA wanted to be a cutting-edge company by implementing new environmental regulations and systems for its products.

With the inclusion of EPA and HVLP systems, as well as progress made in the field of filtration and others, we believe that we can contribute on a daily basis through new developments in our innovation policy.

**Our commercial office and training team
are amongst the pillars of
the SAGOLA BRAND worldwide**

Our training team and the entire company believes that there is an important difference between being merely a quality manufacturer and being a manufacturer which develops and trains workgroups for the various sectors in which we are present.

Sales and Marketing

We believe that the products we make always need a solid sales support. Our commercial partners all over the world appreciate our assistance in setting up their sales networks and technical teams.

Thanks to the efforts of both, we embark upon each new financial year resting on a solid base suitable for the construction of a long-term project. Courses are available both at our Vitoria headquarters and on site.

Customer service

This department is aware that our sales effort requires its support when responding to particular dilemmas, problems or needs related to specific queries we are constantly receiving from all over the world. These are transmitted rapidly to qualified experts who provide immediate data and solutions.

www.sagola.com

The sectors in which we have traditionally had a presence have always considered us a leading brand, but to stay that way all the players in each sector demand that our developments take account of the changes taking place in each field. We therefore have different product lines for each segment in accordance with its needs.

Bodyshop

This is the sector most often identified with SAGOLA, and in many ways the sector which sets the standard for all the others as far as paints and performance are concerned.

Apart from our list of annexes, for this sector we detail our star products in quality and sales volume.

Industrial Vehicle

This sector recognises in SAGOLA an established manufacturer of coating spray guns and equipment. The brand is closely associated with reliability, quality and convenience at work, contributing confidence to the comercial vehicle distribution network.

Industrial Supplies

This is a constantly developing sector in which SAGOLA has always been the reference, with special finishes equipment for pressure and special pumps for products specifically developed for this sector.

Dedicated to continuous improvement in **quality**, **service** and **management**.

Our business partners are aware that SAGOLA, as well as contributing a quality brand, provides them with a manufacturer who has won their loyalty by dint of constant effort over the years. This is something we strive for every day.

We are aware that our development and innovation will be our best allies along with the loyalty of our users in the future.

**SAGOLA has always been export-oriented
and has achieved a notable expansion**

We have always had an export-oriented attitude. We are currently present in more than 80 countries and keep on growing to ensure that our brand, and the products it represents, reach the entire world with the invaluable help and support of our importers.

The **loyalty** of our users is one of our closest allies, in conjunction with **innovation**.

All **painting guides** are available on our website.

Approved Manufacturers

Our relationship with painting manufacturers around the world means that launching SAGOLA in a new market is easier for us.

Our homologations make the market more active because users know that the product they are buying has been tested and homologated by their paint brand.

For many years, SAGOLA has devoted all its efforts not only on improving the quality of its products and service, but also to improve all aspects related with management, HR, environment, etc.

More than 60 industrial patents/models registered worldwide CEE / UK / ASIA/ USA:

- Manual Spray Guns
- Automatic Spray Guns
- Packing Nuts
- Blow Guns
- Air Caps
- Valves
- Deposits
- Keys, Accessories

As a reference it is worth noting that SAGOLA was one of the first companies in Spain to obtain ISO certification, which meant a new management model where improvisation was forgotten and gave way to a management organization fully controlled and automated.

In 2023, Sagola received Nadcap® accreditation for demonstrating their ongoing commitment to quality by satisfying customer requirements and industry specifications.

www.sagola.com

The commitment to the environment by SAGOLA has always been one of its main objectives. This is the reason why SAGOLA has been a pioneer in the manufacture of equipment for low-emission paint solvent to the atmosphere. We were pioneers in meeting environmental regulations as strict as the 1151 of the US California State SCAQMD.

On the other hand the commitment to uphold the highest standards of security makes the manufacture of our products to evolution continuously in its design and manufacturing process. Therefore our standard products meet CE, ATEX, IP54, etc.

SAGOLA is a company which spends significant resources in R&D and is always in constant evolution. As a result of this investigation and due to the need of protection of our own Know-how, SAGOLA is very active in all related with the intellectual property, being owner of a large number of patents worldwide.

Undoubtedly, SAGOLA is a recognized brand worldwide so in this aspect, the protection levels of our brand worldwide are very high.

SAGOLA has got registered its different brands (SAGOLA, DEFYNIK and DELON) practically worldwide.

Our History

1955
SAGOLA foundation as a subcontracting company

1960
SAGOLA begins manufacturing spray guns. Launches the Sagola ALM 401

1966
Expansion of SAGOLA facilities

1973
Due to its growth, SAGOLA builds the new facilities

1980
Sagola is a leader in Spain, Arab countries and Latin America

1990
Sagola launches its low-emission solvent products on the market. One of the top three manufacturers worldwide

1999
Sagola launches the 4200 G spray gun

2007
Sagola launches its first interchangeable HVLP air nozzle

2010
Sagola exports to more than 80 countries

2016
Investment in the latest technology and automation of its manufacturing processes. Sagola launches the 4600 Xtreme spray gun

2020
Sagola is part of the Elcometer Group

2022
Sagola launches the new innovation of the 4100 range spray gun.

2024
Launch of the Dynamic Flow Technology™ system.

D|F|T™
Dynamic Flow Technology

M2M™
Metal to Metal Technology

OUR SPRAYGUN
IN ACTION

Sagola 4600 |

Everything you expect from an industry leading spray gun and more...

Efficient

Ultra-fine atomization and less overspray for an industry leading transfer efficiency.

Easy

Stable fan pattern, uniform from top to bottom, for precise colour matches, seamless transitions, and blends with easier overlapping.

Ergonomic

Designed to be so comfortable you forget you are holding it.

Even

A flawless finish with even particle distribution with minimal patching.

Effortless

It's so easy to use, you get a professional finish every time, with minimal effort.

Economic

Less air, less bounce back for the same flawless result with Dynamic Flow Technology™

Dynamic Flow Technology™

Dynamic Flow Technology™ harnesses the ambient air around the aircap allowing the Sagola 4600 spray gun to provide a flawless finish even at lower working pressures.

The Sagola 4600 provides a more even and uniform paint distribution, from top to bottom. This makes it ideal for difficult base colours such as metallics, silver, and pearls. It also minimises common paint defects like shadows, patch coats, and striping.

All of this is achieved while using less paint, less air, and less time, ultimately lowering your costs and boosting your profits.
DFT™ gives you:

• Greater fan stability.
• Superior atomization.
• Uniform fan from top to bottom.
• Less bounce back, less overspray.
• A more precise application with easier overlapping.
• Less painting defects such as shadowing, patch coats and striping.
• An even paint distribution - ideal for difficult base colours such as metallics, silvers, pearls.

Metal to Metal™ Technology

Greater reliabilty, easier to clean, cheaper to maintain.

For over 70 years Sagola have been manufacturing industry leading spray equipment, often setting the benchmark for others to follow.

Our state-of the-art European production facilities uses aerospace grade engineering which allows us to create spray guns using metal to metal technology - which means our spray guns have fewer joints, o-rings and seals than any other spray gun on the market.

• Low maintenance.

• Fewer wearing parts.

• Low cost of ownership.

• Fast clean & colour change.

• No packings, joints or seals in fluid area.

• Greater reliabilty.

Sagola 4600

**SAGOLA
4600**

Air caps with DFT™ system

The latest technology that Sagola has designed for the latest generation air caps added to the DVR suction system, makes them the most efficient on the market.

DFT™
Dynamic Flow Technology

SAGOLA 4600 *BASE*

The Ultimate Basecoat Spray Gun for Colours, Metallics or Silvers

• Ideal for waterborne and solvent basecoats.

• Making it easier to colour match metallics, silvers & pearls.

• Maintains the uniformity of metallic colours even at low pressures.

• HVLP performance in an EPA Compliant gun.

• Standard or digital versions available.

SAGOLA 4600 *HVLP*

Designed for High Volume Low Pressure Applications

• Ideal for waterborne and solvent basecoats and specialist coatings.

• Large fan size to reduce application distance increasing transfer rates.

• Our fastest HVLP application speed.

• Maximum reduction of overspray.

• Standard or digital versions available.

SAGOLA 4600 *CLEAR*

Designed for clearcoats, single stage paints and OEM quality finishes

• For clearcoats high solids / ultra high solids and single stage products.

• Ideal for matching OEM quality finishes.

• Maximum application speed.

• Minimal overspray.

• Ultra fine atomization.

• Standard or digital versions available.

SAGOLA 4600 *CLEAR PRO*

Perfect for luxury mirror finishes, clearcoats and single stage paints

• High gloss in express drying clearcoats.

• Maximum application speed.

• Maximum control. Large fan size.

• Minimal overspray.

• Premium mirror finishes.

• Standard or digital versions available.

Lubricant grease Natural grease. High consistency, even under extreme temperatures. Long lasting, it doesn't lose properties over the time. 100 ml. can.

Code 56418589

(see page 87)

Bodyshop
Refinish
Sprayguns | **Altair Led**

Highly efficient 4500 Kelvin led that replicates the sun light. Perfect spray control of metallics, pearls and clear coats.

CLIP&GO system

It is assembled in a CLIP without the need of disassembling any element from the gun.

High light
intensity led system
for Sagola 4600 & 3300 GTO gun

High precision visual control in colours spray

Visual control of layer coverage and fan pattern overlap, as well as correct orientation of metallic particle or pearl effect avoiding variations of tone due to bad dispersion of particles and/or mottling due to lack or excess of paint supply.

Improvement of finish quality

As in the colour base, a better control of layer dispersion and fan pattern overlap will be achieved avoiding irregular clear coat supply (lack or excess material), gloss irregularities, load irregularity (orange peel).

Sprayguns **3300 GTO / GTO CAR**

From a basecoat, to a filler or gun putty. There's nothing better than the 3300 GTO spraygun. Wide variety of aircaps and fluid nozzles from 1.2 mm. up to 2.8 mm.

Finishes: 1.3 - 1.4 mm.
Primers: 1.6 - 1.8 mm.
Gun putties: 2.0 - 2.8 mm.

Unreachable technologies for many..., incorporated in our mid-range of sprayguns.

Versatility

HVLP and EPA high transfer Aircaps made of duralumin. Forged aluminum body with 'soft touch' satin finish. No joints or plastic inserts in the product area. One-piece self-adjusting packing gland. Ergonomic trigger made of stainless steel.

TECHNICAL DATA		3300 GTO
Weight with cup: (3300 GTO)	662.4 grams	1.46 lbs
Weight without cup: (3300 GTO)	474.8 grams	1.05 lbs
Weight with cup: (3300 GTO CAR)	783 grams	1.72 lbs
Weight without cup: (3300 GTO CAR)	595 grams	1.31 lbs
Dimensions without cup (3300 GTO)	18.2 x 1.9 x 17.8 cm.	7.16 x 0.75 x 7.05 "
Dimensions without cup (3300 GTO CAR)	18.2 x 4.8 x 22 cm.	7.16 x 1.89 x 8.66 "
Air inlet connection	BSP 1/4" Male	
Cup	650 ml. capacity (22 fl oz.) Cup with anti-drop system	
Product filter	Includes 80-mesh product filters	
Recommended working pressure	2 bar	29 psi
Average sound pressure level	80 dB	
Materials in contact with the product	Anodized aluminum, chromed aluminum, POM, Stainless steel and Teflon	

3300 GTO / GTO CAR

3300 GTO spraygun main news

01 SUPER LIGHT. -METAL TO METAL- TECHNOLOGY.
No sealing joints between components.

02 High strength FORGED ALUMINUM BODY.
REGISTER DC 924667-0004 DESIGN REGISTER.

03 NEW ALUMINUM AIRCAPS.
GTO TECH / GTO HVLP / 3300 EPA / 3300 EVO
Ultra-fine atomization and larger fans. Designed for the best response at any pressure. With mechanized aerodynamic caps which eliminate turbulence and reverse painting.

04 One single piece AUTOMATIC PAINT PACKING GLAND.
Unique in the market. It avoids manipulation and breakage of the glands and makes it easier to remove for thorough cleaning of the paint area.

05 ERGONOMIC TRIGGER.
Made of stainless steel. It reduces fatigue.

06 NOZZLE AND NEEDLE.
Made of stainless steel.

07 "SOFT FLOW" AIR VALVE.
Smooth trigger even at high air pressure levels. No pressure drops between the 1st and 2nd stage of the trigger. Save paint by regulating air pressure with the trigger partially pulled (1st stage).

08 SINGLE SHAFT SYSTEM.
Directly continuing Xtreme model series with a simplified design, synchronized performance in any kind of situation, fewer parts, and maintenance reduction.

09 NEW COLOUR IDENTIFIER.
Perfect for differentiation spray guns when there are multiple painters. (COLOR CODE)

10 AIR FLOW REGULATOR with PRESSURE GAUGE. It maintains the working pressure according to the parameters of Emissions regulations. (Green scale). Standard in TECH / HVLP bodyshop versions. GTO CAR Version. **Code 40000335**

Approved for use by leading paint brands. Visit www.sagola.com to download our Paint Application Guides.

www.sagola.com

3300 GTO CAR

Including air flow regulator with RC2 pressure gauge in the finishing versions.

Code 40000335. (see page 87)

GTO CAR aircaps technical data / Versions

GTO TECH Aircap. Versatility brought to the maximum expression. Suitable for both colour and clearcoat and single stage products. High atomization level. Sagola EPA high transfer system.

Recommended application	Recommended nozzle	Product output flow	Fan size	Application distance	Code 3300 GTO CAR
WATERBORNE BASECOAT	1.30	169 g/min. (6 oz/min.)	305 mm. (12")		10141551
CLEARCOAT QUICK DRYING				18 - 20 cm. (7 - 7.9")	
SOLVENT BASECOAT	1.40	179 g/min. (6.3 oz/min.)	315 mm. (12.4")		10141552
UHS CLEARCOAT					
SINGLE STAGE					

Air consumption at 2 bar (29 psi):
285 L/min. (10.06 cfm)

Recommended pressure:
1.8 - 2.2 bar (26.1 - 31.9 psi)

GTO HVLP Aircap. Sagola HVLP System. Low aircap pressure to paint closer to the part and increase the transfer rate. Perfect colour uniformity, especially in metallics.

Recommended application	Recommended nozzle	Product output flow	Fan size	Application distance	Code 3300 GTO CAR
WATERBORNE BASECOAT	1.30	145 g/min. (5.1 oz/min.)	245 mm. (9.6")		10141554
				18 - 20 cm. (7 - 7.9")	
SOLVENT BASECOAT	1.40	161 g/min. (5.7 oz/min.)	250 mm. (9.8")		10141558

Air consumption at 2 bar (29 psi):
360 L/min. (12.71 cfm)

Recommended pressure:
1.8 - 2.0 bar (26.1 - 29 psi)

GTO CAR aircaps technical data / Versions

PRIMERS

GTO EPA Aircap. Sagola EPA high transfer system. Specially designed to obtain a smooth and uniform finish. Saving time and consumables in the sanding process.

The reduction of spray mist (overspray), makes it suitable for use outside the booth in preparation areas; also achieving a significant reduction in the consumption of primer and in the emission of toxic components for the environment.

Recommended application	Recommended nozzle	Product output flow	Fan size	Application distance	Code 3300 GTO
SANDING PRIMERS	1.60	156 g/min. (5.5 oz/min.)	225 mm. (8.9")	18 - 20 cm. (7 - 7.9")	10141563
	1.80	184 g/min. (6.5 oz/min.)	245 mm. (9.6")		10141564

Air consumption at 2 bar (29 psi): 250 L/min. (8.8 cfm)
Recommended pressure: 1.8 - 2.0 bar (26.1 - 29 psi)

GTO HVLP Aircap. Sagola HVLP System. Large fan size. Low aircap pressure to paint closer to the part and increase the transfer rate.

Smooth and uniform finish to save time and consumables in the sanding process. Reduction of spray mist (overspray).

Recommended application	Recommended nozzle	Product output flow	Fan size	Application distance	Code 3300 GTO
SANDING PRIMERS	1.60	172 g/min. (6 oz/min.)	260 mm. (10.2")	12 - 15 cm. (4.72 - 5.90")	10141556
	1.80	193 g/min. (6.8 oz/min.)	295 mm. (11.6")		10141557

Air consumption at 2 bar (29 psi): 360 L/min. (12.71 cfm)
Recommended pressure: 1.5 - 2.0 bar (21.7 - 29 psi)

GTO EVO Aircap. Sagola EPA high transfer system. Maximum atomization quality to achieve a fine and stretched finish. large fan size.

Recommended application	Recommended nozzle	Product output flow	Fan size	Application distance	Code 3300 GTO
PRIMERS WET ON WET	1.30	172 g/min. (6 oz/min.)	260 mm. (10.2")	18 - 20 cm. (7 - 7.9")	10141559
	1.40	179 g/min. (6.3 oz/min.)	280 mm. (11")		10141560

Air consumption at 2 bar (29 psi): 255 L/min. (9.01 cfm)
Recommended pressure: 1.8 - 2.0 bar (26.1 - 29 psi)

GTO 64S/62S Aircaps. Maximum product output flow and atomization power for the application of putties on large surfaces. Smooth and uniform finish. Saving time and consumables in the sanding process.

Recommended application	Recommended nozzle	Product output flow	Fan size	Application distance	Code 3300 GTO
GUN FILLERS	2.20 64S	300 g/min. (10.6 oz/min.)	300 mm. (11.8")	18 - 20 cm. (7 - 7.9")	10141572
	2.80 62S	397 g/min. (14 oz/min.)	250 mm. (9.8")		10141574

Air consumption at 2 bar (29 psi) 64S: 310 L/min. (10.9 cfm)
Air consumption at 2 bar (29 psi) 62S: 270 L/min. (9.5 cfm)
Recommended pressure: 2.0 - 2.5 bar (29 - 36.2 psi)

Mini Xtreme

Spraygun main news

01 NOZZLES. Made of stainless steel.
Maximum application speed.

02 AIRCAPS. Made of duralumin. Highly resistant and light.
EPA and HVLP Systems. Totally interchangeable. 4 aircaps to
choose. Each compatible with all available fluid nozzle sizes.
High transfer HVLP aircap. Designed under the highest
environmental standards. Without pressure reducers in the body
of the gun We convert from a conventional system to an HVLP system,
only changing the aircap. Two high transfer EPA aircaps.

03 "SOFT FLOW" AIR VALVE.
Smooth trigger even at high air pressure levels.
No pressure drops between the 1st and 2nd stage of the
trigger. Save paint by regulating air pressure with the trigger
partially pulled (1st stage).

**04 PRODUCT REGULATOR with FLOATING
RING**. For precise regulation of product flow.

05 IDENTIFYING RINGS OF COLOURS. (COLOR CODE).
Perfect for differentiation of spray guns when there are multiple painters.

**06 ANODIZED FORGED ALUMINUM BODY
High strength in just 365 grams**

07 "METAL TO METAL" TECHNOLOGY. Product zone free of plastic diffusers, gaskets or
inserts in the fluid nozzle. Extremely easy to maintain and clean.

08 One single piece AUTOMATIC PRODUCT PACKING GLAND.
Made of stainless steel. It avoids manipulation and breakage of the glands
and makes easier to remove it for a through cleaning of the paint part.

09 AIR FLOW REGULATOR with GAUGE.
The RC1 pressure regulator is the perfect ally for the
Non-digital version. Hand tighten, no wrench needed.
Perfect closing. Without Teflon coating the air inlet
of the gun.

10 SPECIAL MINI TECH JET ROUND AIRCAP.
Convert your Mini Xtreme to an airbrush.
Specially designed for low-viscosity products,
lettering and small retouches.

11 CUP OPTIONS. (See page106)
- 125 ml. white cup
- 125 ml. black cup for UV products
- 500 ml. white cup
- 650 ml. white cup

This exploded view is not the material list of the spraygun

Clean the spraygun correctly. No metal tools. Only brushes. Lubricate the moving parts of the gun after each cleaning.

Cleaning kit Brush and sticks for optimum cleaning outside and inside the gun.

Code 40000086

Lubricant grease Natural grease. High consistency, even under extreme temperatures. Long lasting, it doesn't lose properties over the time. 100 ml. can.

Code 56418589

(see page 87)

The importance of small details

Precision solutions for tiny details and retouches.

Very light injected-aluminium body.

Very high quality of spray.

TECHNICAL DATA		**475 XTECH**
Weight with cup (with air flow regulator)	339.4 grams	0.75 lbs
Weight without cup (with air flow regulator)	272.9 grams	0.60 lbs
Dimensions with cup (with air flow regulator)	12.1 x 6.7 x 28.3 cm.	4.76 x 2.64 x 11.14 "
Dimensions without cup	10.9 x 3.3 x 15.2 cm.	4.29 x 1.3 x 5.98 "
Air inlet connection	BSP 1/4" Male	
Cup	125 ml. (4.23 fl oz.) capacity Cup with anti-drip system	
Product filter	Includes 80-mesh product filters	
Recommended working pressure	2 bar	29 psi
Average sound pressure level	80 dB	
Materials in contact with the product	Anodized aluminum, chromed aluminum, POM, Stainless steel and Teflon	

www.sagola.com

475 XTech

The SAGOLA 475 XTech spraygun that due to its reduced dimension becomes ideal for shadings, little retouches and/or painting of small parts.

Injected aluminum body, very light. Manufactured with Sagola high technology to provide a very high quality of atomization.

This model incorporates the high quality gravity cup with a 125 ml capacity. Includes paint filter.

Available with three aircaps. Variety of nozzles to give great precision to the retouching and painting of parts.

The **Sagola 475 XTech**, designed for **precision solutions** in the small details and retouching of bodyshop parts.

05 AIRCAP
High quality spray at feathering and retouches.
Nozzle available: 0.50 / 0.80

10 AIRCAP
Quick and versatile. Special for metallics and clearcoats.
Nozzle available: 1.00

R5 AIRCAP
Maximum precision at the tiniest feathering. Definition and regulation. Similar to an airbrush.
Nozzle available: 0.50

Very light injected-aluminium body
Injected-aluminium body. A highly manageable spraygun with reduced dimensions and low weight.

High quality of spray
High transfer and low air consumption.

Air flow regulator
Incorporates air flow regulator, high quality and precision.
Code 56418417

Classic Lux | Sprayguns

The SAGOLA Classic LUX gun offers one of the best quality/price ratios in its range of conventional primer guns.

With a new body design and improved ergonomics, the Classic LUX spraygun expands the range of responses and application solutions.

Single shaft design. Less number of parts, minimum maintenance. No joints between the air and the paint. One piece packing gland. Internal air distributor.

Nozzles and needles in stainless steel. Air, product and fan flow regulators.

40 AIRCAP
Primers and fillers
Available nozzles:
1.40 / 1.60 / 1.80

41 AIRCAP
Primers and fillers
High thickness
Available nozzles: 2.00

42 AIRCAP
Fillers
High viscosity. Gun fillers.
Available nozzles: 2.50

Cup
650 ml. cup capacity. Includes anti-drip system and paint filter.

Low air consumption
High quality of aircaps, with low air consumption.

Body
Novelty in the chrome of the gun body. Matte chrome.

Nozzle and Needle
Made of stainless steel.

Recommended working pressure	X series: 2 - 3 bar (29 - 43.5 psi)	Xtreme CER/PD: 3 - 4 bar (43.5 - 58 psi)
Average sound pressure level	80 dB	
Materials in contact with the product	Anodized aluminum, chromed aluminum, POM, Stainless steel and Teflon	

Sagola X 4100 series pressure

Spraygun main news

01 Forged and anodized aluminum **BODY.** Great robustness, lightness and high corrosion protection. Register DC 3 300.029

02 NOZZLES AND NEEDLES made of stainless steel. High precision. High flow. Maximum application speed.

03 High durability **AUTOMATIC PRODUCT PACKING GLAND.** One single piece. Stainless steel body in quick-change format. Avoid manipulation and breakage of the glands and facilitates their disassembly for the integral cleaning of the paint area. Unique in the market. Patented system P073000321.5.

04 AIRCAPS. Made of high-strength and lightweight duralumin (corrosion-free). HVLP and EPA systems. Fully interchangeable. 4 choice of aircaps compatible with all available fluid nozzle sizes.

High Transfer HVLP Aircap. Designed under the highest environmental standards. Without pressure reducers in the body of the gun. We convert from a conventional system to an HVLP system, only changing the nozzle.

05 **"SOFT FLOW" AIR VALVE**. Smooth trigger even at high air pressure levels. No pressure drops between the 1st and 2nd stage of the trigger. Save paint by regulating air pressure with the trigger partially pulled (1st stage).

05* VÁLVULA DE AIRE "ULTRA SOFT FLOW". Innovative valve kit that reduces trigger fatigue by up to 65%. An unprecedented ergonomic innovation that significantly improves working conditions for industrial painters.

06 TRIGGER AND AXIS. 100% made of stainless steel. Relocated lever point for more comfortable tightening. Ultra-ergonomic design. Reduces fatigue.

07 AIR INLET REGULATOR.
Modern design without sharp edges, it makes easier cleaning. Higher control precision. Ideal for quick adjustment.

08 NEEDLE GUIDE BOX.
Reinforced in stainless steel. Very high resistance to mechanical abrasion.

09 PRODUCT REGULATOR. Sensitive adjustment of the amount of material to be applied.

10 FAN REGULATOR. High precision progressive.

11 AIR INLET. 1/4" stainless steel.

12 FILTER HOLDER WITH SWIVEL COUPLING. Facilitates access to difficult areas and reduces fatigue in continued painting sessions. (OPTIONAL)

13 PRODUCT TUBE for hose alignment. Made of stainless steel. (OPTIONAL)

"METAL TO METAL" TECHNOLOGICAL VANGUARD.
Very high mechanization technology. The only spraygun on the bodywork market manufactured without any type of gasket, neither inside nor outside, in the closures between the air and the paint. Minimize the number of spare parts.

VÁLVULA ULTRA SOFT FLOW*

Sagola 3300 GTO Pressure

Ideal for painting large surfaces, machinery and industrial vehicles
Continuous working days

Versatility.
Industrial finishes

With the 3300 GTO pressure spraygun, SAGOLA offers a very high level product with an excellent quality / price ratio. This suction spraygun is characterized by its versatility.

High performance spraygun. High speed application for painting large surfaces. Offers large fan sizes.

Ideal for the application of enamels, varnishes, primers and basecoats.

High-end aluminum aircaps. Nozzles and needles made of stainless steel.

TECHNICAL DATA		3300 GTO PRESSURE
Weight	474 grams	1.04 lbs
Dimensions	17.8 x 17.5 cm. (width of handle 1.9 cm.)	7 x 6.9 " (width of handle 0.75")
Air inlet connection	BSP 1/4" Male	
Cup	Product input through pressure pot or pneumatic pump	
Recommended working pressure	2 - 3 bar (29 - 43.5 psi)	
Average sound pressure level	80 dB	
Materials in contact with the product	Anodized aluminum, chromed aluminum, POM, Stainless steel and Teflon

SAGOLA
an Elcometer company

Sagola 3300 GTO Pressure

Body

Chromed and forged aluminum body. Light spraygun but with great robustness.

Quality / price ratio

High-level manufacturing spraygun with high performance at a low cost.

Aircaps

Aluminum aircaps available in EPA and HVLP. Very low air consumption.

Spraygun main news

01 SUPER LIGHT. -METAL TO METAL- TECHNOLOGY.
No sealing joints between components.

02 High strength FORGED ALUMINUM BODY.
REGISTER DC 924667-0004 DESIGN REGISTER.

03 NEW ALUMINUM AIRCAPS.
GTO HVLP / 3300 EPA
Ultra-fine atomization and larger fans. Designed for the best response at any pressure. With mechanized aerodynamic caps which eliminate turbulence and reverse painting.

04 One single piece AUTOMATIC PAINT PACKING GLAND.
Unique in the market. It avoids manipulation and breakage of the glands and makes it easier to remove for the thorough cleaning of the paint area.

05 ERGONOMIC TRIGGER.
Made of stainless steel.
It reduces fatigue.

06 NOZZLE AND NEEDLE.
Made of stainless steel.

07 SINGLE SHAFT SYSTEM.
Directly continuing Xtreme model series
with a simplified design, synchronized performance in any kind of situation, fewer parts, and maintenance reduction.

08 HIGH PRECISION AIR INLET REGULATOR. Modern design without sharp edges, it makes easier cleaning.
Higher control precision. Ideal for quick adjustment.

09 AIR FLOW REGULATOR with PRESSURE GAUGE.
It maintains the working pressure according to the parameters of Emissions regulations. (Green scale). Code 40000335

Sagola 3300 GTO Pressure
3300 GTO aircaps technical data / Versions

3300 EPA Aircap. Versatility and perfect adaptation to any type of industrial painting project. High gloss finishes, primers and high viscosity paints.

EPA PAINTED SYSTEM

Recommended application	Recommended nozzle	Aircap	Air consumption at 2 bar	Recommended pressure	Application distance	Code Spraygun
HIGH QUALITY FINISHES	1.00	**3300 EPA**	250 L/min. (8.8 cfm)	1,5 - 2,0 bar (21.7 - 29 psi)		**10152214**

Mini Xtreme Pressure

High resistance forged and anodized aluminum body.

Ideal for painting chassis and structures.

Perfect ERGONOMICS: Due to its size it is the perfect spray gun for retricted access areas which require a lot of wrist movement.

mini XTREME

Unlimited possibilities in 347g

Its compact size makes this gun the perfect choice for working in hard to reach areas. Also suitable for spot repair work or lettering. It reduces mist, saves paint and perfectly defines the work zone.

Mini EPA aircap   **Mini VIT aircap**   **Mini HVLP aircap**

SAGOLA

Pressure Pots

Elcometer pressure pots come into their own when pumping equipment demands the maximum durability and minimum maintenance, even with the most abrasive paints (enamels, ceramic and vitro-ceramic clears, cast iron effect, pastes...) or corrosive products (dyes, waterborne paints...).

Suitable for any type of paint

Made of aluminum or stainless steel, Elcometer's range of pressure pots is suitable for both waterborne and solvent basecoats, abrasive products, high-viscosity primers or fluid dyes. Check our range, there is an ideal configuration for your product.

Top outlet

Elcometer's superior product outlet pressure pots minimize cleaning tasks. Avoid pouring paint into the pressure tank by using one of our interchangeable aluminum tanks or by directly inserting the paint bucket. Simply remove it after painting, and the pressure pot is almost clean.

Maintenance free

An adequate cleaning process is enough to maintain the Sagola pressure pot. There are no wear parts inside so focus on getting a good finish.

High-end features

Double high precision regulators, various mixer options: Manual, pneumatic rotary, pneumatic alternative; discharge valve, high quality materials,... Sagola pressure pots are designed and built following the highest quality standards.

Components for the range of Sagola pressure pots

Air and product hose

8 x 15 mm. anti-static air hose and
6 x 8 mm. product hose with Nylon cover.
Light and resistant hose. (see page 143)

SAGOLA
an Elcometer company

Introduction

Elcometer's range of **pressure pots** is the best option for large surface projects where a good balance between application speed, finish quality and easy cleaning is required.

Made of stainless steel or aluminum with high-precision regulators, several mixer options (manual, pneumatic...) and superior product outlet; an extremely easy system to clean and maintain.

Versions in 2.5 and 10 liters of capacity. Increase your productivity and save time by not having to refill the gun deposit.

Pressure pots main news

01 TANK OR DEPOSIT made of Stainless Steel or Aluminum. Very robust and easy to clean.

02 TANK LID made of Stainless Steel or Aluminum. High quality sealing to prevent leaks.

03 PRODUCT OUTLET VALVE. Ball valve to open or close the product outlet.

04 MANUAL PRODUCT MIXER. (Optional) Mixer for homogenization of the product.

05 AIR INLET. Air inlet of 1/4".

06 SPRAYGUN PRESSURE REGULATOR. Precise control of gun pressure.

07 POT PRESSURE REGULATOR. High quality gauge.

08 DISCHARGE VALVE. Pressure release valve.

09 CLAMPS. Very robust clamps for closing the pot.

10 MIXER BLADES. (Optional)

Industrial Bodyshop
Pressure Pots

Elcometer P10T

The range of Elcometer pressure pots is characterized by its simple handling and minimal maintenance to provide a great service to professional painting.

Maximum quality of finishes for industrial vehicles painting industries.

The Elcometer P10T pressure pot is made of Stainless Steel, being a very robust product.

The tank capacity is 10 liters. Includes manual product mixer or pneumatic mixer. The product outlet is in the upper area of the pot.

Double, high precision, robust regulators with discharge valve.

Valid for waterborne and solvent-based paints. Ideal for Industrial Bodyshop and Nautical Sports.

Elcometer KARA 1/30

KARA 1/30 pneumatic pump Spare parts

The Elcometer KARA 1/30 pump is covered by a **3-year** manufacturers warranty from Elcometer.

Please follow the recommended housekeeping and maintenance procedure as prescribed in the operation manuals.

This exploded view is not the material list of the pump

www.sagola.com

Elcometer is committed to high-quality and service. For this reason Elcometer provides with a warranty spares service for products supplied over the past 10 years.

Clean the pump correctly. Follow the cleaning steps in the instruction manual for proper operation of the equipment.
Accessories and Application Guides

03

Service, a key word in SAGOLA's strategic approach to bodyshop.

One of our main concerns is to make the painter be able to quickly identify and acquire the main SAGOLA original spare parts - nozzles, needles, aircaps, racks, deposits, regulators...

In this section we offer our application guides and our main accessories.

Accessories and application guides

Aircaps

The **aircap model** is vital to achieve the desired results. The type of product we are going to apply and the application system we are going to use must both be taken into account when selecting an aircap. We will obtain the desired spray by correctly combining the aircap with the correct nozzle and needle kit, and a proper air supply.

High transfer aircaps

AIRCAP	Spraygun model	Painting System	Recommended application	Nozzle (mm.)	Air consumption	Code
DVR CLEAR PRO	SAGOLA 4600	EPA	Quick Drying clearcoats. Single Stage. Ultra high gloss finishes	1.2 - 1.4	315 L/min. / 11.12 cfm	56418760
DVR CLEAR		EPA	HS Clearcoats and Single Stage. OEM finishes	1.2 - 1.4	295 L/min. / 10.42 cfm	56418762
DVR BASE		EPA	Special Waterborne and Solvent basecoats. Ease of application at low pressure	1.2 - 1.4	280 L/min. / 9.88 cfm	56418759
DVR HVLP		HVLP	Special colour waterborne and solvent basecoat. Minimum mist. Maximum savings and perfect paint uniformity. 0.68 bar (10 psi) at aircap	1.2 - 1.4	450 L/min. / 15.89 cfm	56418761
MINI AQUA	MINI XTREME Gravity	EPA	Special Spot Repair. UV fillers. Parts coating. Basecoats, clearcoats and waterborne products	0.8 - 1.2	190 L/min. / 6.71 cfm	56418524

Sprayguns accessories

RC1 Flow regulator with pressure gauge

Aluminium, very light. Ideal for high transfer HVLP and EPA spray guns. Red to green pressure scale (green within provisions of regulations). Assembled in seconds with hermetic hand tightening.

Code
56418020

High precision flow regulator

High precision air-flow regulator kit. Solvent-proof gaskets. Suitable for SAGOLA 4600 digital. Recommended for finishing spray guns.

Code
56418519

RC2 Flow regulator with pressure gauge

Pressure gauge flow regulator. Exact input pressure gun. High quality gauge green scale for high transfer guns.

Code
40000335

Pressurizer kit

For gravity spray guns. Gravity cup pressure kit for high viscosity materials spraying. Non-return valve included.

Code
56418513
4600 HVLP Tester

Pressure checker for HVLP aircaps (SAGOLA 4600 spray gun model).

Code
10010051

SP2 and SP1 Magnetic Stands

Magnetic stand for 1 (SP1) or 2 (SP2) spray guns. Solvent-proof paint. Supports PPS type adapters. Maximum robustness. High holding power due to two powerful magnets.

Version	Code
SP 1	40000245
SP 2	40000246

Cleaning kit

Complete cleaning set, including one brush for outside cleaning, and rods of different sizes for all the inner paths of the spray gun. Supplied in a practical show case.

Code
40000086

Lubricant grease

Natural grease, specially made for spray guns and painting equipments moving parts lubrication. High consistency, even under extreme temperatures. Long lasting, it doesn't lose properties over the time.

Code
56418589

Ford 4 - Viscosimeter

Viscosity dip cup, made of polyamide (solvent resistant) with metal outlet hole (brass).

Code
56418001

Airbrush and Touch-Up's

04

Your Airbrush project is important to us.

We take care of the little things, so you don't have to.

Sagola Airbrushes are designed for:

> Feathering

> Precise Part Touch Up's

> Part Marking

SAGOLA
an Elcometer company

We take care of the presice details

with Sagola's range of professional airbrushes

XTech Airbrushes

SAGOLA's XTech Airbrushes is engineered to meet the demands of the discerning airbrush artist and professional painter.

Airbrushes for automotive, fine arts, bodypaint, tanning, illustration, make-up, model making, confectionery, temporary tattoo - tattoo, textiles, nail decoration...

The range is divided in 5 different models, one for each type of application.

- Needle closing and packing made of Teflon.
- Highly precise and smooth air and product valve.
- Working pressure 15/30 psi   1/2 bar
- Air inlet connection: 1/8" male

XTech 100 Airbrush

Sagola XTech 100 airbrush. Dual action professional airbrush and gravity feed paint system.

0.2 mm. neddle and nozzle set up, that offers a superfine spraying, for the highest precision.

0.9 ml. deposit to use with small quantity of paint. Ideal for quick colour changes.

Version	Code
Ø 0.2 **XTech 100**	17410501

XTech 200 Airbrush

Sagola XTech 200 airbrush. Dual action professional airbrush and gravity feed paint system.

0.2 and 0.3 mm. neddle and nozzles, that offer a fine spraying and a high precision.

1.5 ml. deposit to use with medium amounts of paint. Easy to clean. Ideal for quick colour changes.

Version	Code
Ø 0.2 **XTech 200**	17410601
Ø 0.3 **XTech 200**	17410602

XTech Airbrushes

XTech 300 Airbrush

Sagola XTech 300 airbrush. Dual action professional airbrush and gravity feed paint system.

0.3 mm. neddle and nozzle set up, that offers a fine pulverization and a good precision.

5 ml. deposit to use any paint quantity, but maintaining the advantage of an easy cleaning and colour change.

Version	Code
Ø 0.3 **XTech 300**	17410701

XTech 400 Airbrush

Sagola XTech 400 airbrush. Dual action professional airbrush and gravity feed paint system.

0.3 mm. neddle and nozzle set up, that offers a fine pulverization and a good precision. Ideal for murals for a bit thicker colors.

9 ml. deposit to use any paint quantity, but maintaining the advantage of an easy cleaning and colour change.

Version	Code
Ø 0.3 **XTech 400**	17410801

XTech 500 Airbrush

Sagola XTech 500 airbrush. Dual action professional airbrush and suction feed paint system.

0.3 and 0.5 mm. neddle and nozzles, that offer a fine spraying from a high precision to a large spray pattern.

22 ml. suction deposit with fast change system. Ideal for changing color in an instant.

Ideal for projects such as T-shirts, Remote control cars.

Version	Code
Ø 0.3 **XTech 500**	17410901
Ø 0.5 **XTech 500**	17410902

CP Compressors

CP 2000

CP 1000

CP compressors have been specifically designed for use with the XTech range of airbrushes. Compact, powerful and with high reliability.

Both models incorporate a filter with an air outlet regulator and a automatic stop switch.

The sound level is minimal, with a maximum of 47 dB. They are ultra-silent.

Single cylinder compressor (CP1000) and two-cylinder compressor (CP2000). Minimum maintenance.

Full case weight	3 Kilograms	6.6 lbs
Case dimensions	40 x 35 x 8 cm.	15.7 x 13.8 x 3.1 "
475 XTech spraygun features	see page 36	
XTech 500 airbrush features	see page 111	

Description	Code
Premium 3800 case	25410502

Contents of the Premium 3800 Case kit

Each Sagola Premium 3800 is supplied with:

• Transport case.
• 475 XTech gravity spraygun with R5 aircap and fluid nozzle Ø 0.5 mm.
• XTech 500 airbrush with suction deposit.
• Quick plug for gravity gun.
• 3 meters special braided hose for airbrushing.
• Accessory wrench.

Crompressed air filtering 05

The air from a compressor which is circulating throughout the line contains particles and solid impurities, water from the relative humidity of the suctioned air and burnt oil from the compressor.

That's why it is necessary to eliminate these impurities with the help of a filter but taking into account that we always have to obtain the maximum performance with the minimum pressure loss.

SAGOLA filtering systems guarantee maximum air quality.

Temperature

- General recommendation: Between 15ºC and 25ºC
- At least 5ºC above the dew point of the booth.
- At least 5ºC above the dew point of compressed air.

Dew point

DP < 3ºC   Optimum air quality

3ºC < DP > 7ºC   Good air quality

DP > 7ºC   Poor air quality

Thermohygrometer

content in the
Sagola Air Quality Test.
Measure:
Compressed air temperature.
Compressed air dew point.
Relative humidity of compressed air.

Pack 6000X

**Compressed air
temperature regulation**

Elcometer 319

**Measurement of environmental
conditions in the booth and
on the surface**

Temperature

Part temperature at least 5ºC
above booth dew point.

AIR, TEMPERATURE AND HUMIDITY

THE PERFECT BALANCE BETWEEN ALL THE BOOTH ELEMENTS

Sagola's air treatment tools and diagnostic equipment for environmental conditions provide the necessary information to achieve the perfect balance between all the elements of the booth.

Booth filter

Elimination of condensates and vapors of water and oil. Solid particle retention.
Solids trap

Content in the Sagola Air Quality Test.

Diagnosis of the presence of solid particles, air or oil condensates in the compressed air network.

5000X range filters

Air filtering systems

It is necessary to remove the impurities from the compressed air by means of a filter, bearing in mind that the maximum performance must be obtained for the painting job.

SAGOLA FILTERING SYSTEMS guarantee maximum air quality and minimum pressure loss of line.

The air from a compressor which is circulating throughout the line contains particles and solid impurities, water from the relative humidity of the suctioned air and burnt oil from the compressor.

That's why it is necessary to eliminate these impurities with the help of a filter but taking into account that we always have to obtain the maximum performance with the minimum pressure loss.

SAGOLA filtering systems guarantee maximum air quality.

With the recent emergence of the new regulations concerning the drastic decrease of solvents in the new primers, basecoats, HS clearcoats and even in the waterborne paints, the existence of impurities in the compressed air which is used to spray is now more critical for the final results of the bodywork, mainly due to:

- In HS: the high gloss of these paints, their poor proportion of solvents and their decrease in the number of finishing coats make that the small particles proceeding from the compressed air become striking.

- In waterborne paints: their high incompatibility with any oil and organic fumes makes the air quality requirements very high.

Keys for the correct selection of the filter

The type and condition of the installed compressor and the quality of the air it is supplying must be taken into account for the election of a filtration system to install.

For example, If greater air purity is required a model **5200X Coalescent Purifier Regulator** should be installed -with which the following will be eliminated water and solid particles larger than 0.01 microns, water aerosols (C>0.01 mg/m^3) and oil aerosols (C>0.01 mg/m^3)- or a **Purifier regulator with Coalescent Filter plus Active Charcoal model 5300X** -used when it is necessary to eliminate oil, hydrocarbons or water in vapour form , organic fumes are present, foul air, solid particles larger than 0.01 microns and residual oil: maximum 0.003 p.p.m.-.

5000X range filters

Air filters designed and developed for the new technologies of automobile painting. Ideal for waterborne and HS paints.

Maximum air quality

The quality of compressed air is becoming more important every day in production processes. Contaminated air causes damage and manufacturing costs in many cases.

Not only is it important to have good quality compressed air where it may come into contact with the product, it is therefore essential to carry out a quality analysis of the compressed air.

Obtaining a good quality of compressed air is essential for a correct operation of the machines and to achieve an optimal final finish in the production processes.

Minimum pressure loss within the line

For these reasons it is necessary to eliminate impurities by means of a filter, taking into account that the maximum performance with the minimum pressure loss must be obtained.

Ventajas principales

• Air-assisted regulator.

• Rapid discharge; instant pressure reduction.

• Aluminium body. CNC machined for toughness.

• Unmanned discharge of liquids and impurities.

• Maximum flow 3,000 L/min., outlets for 2 guns.

• 8µ filter + Deflector of high capacity of solid and liquids retention.

• 1/2" inch air inlet.

• Filter life control. We incorporate dynamic element of life control.

Complete 5000X Series Filtration System

Compressed air inlet

with

5300X Filter

Sagola 5300X filter offers the maximum filtration level in spray booths and painting lines where finishing is highly demanding.

Three filtered stages. Sinterised brass 8 microns pre filtration is incorporated, followed by a 0.01 micron Coalescent filter and final filtration by a wide surface active charcoal filter.

Ideal for waterborne painting lines (and organic vapor problems in the network).

This model eliminates, in addition to water and impurities, organic fumes and foul air.

= 7 bar / 101,53 psi
Versatile modular system

If you need to upgrade your system from a standard filter to a coalescing system or upgrade to activated carbon, with the Sagola 5000X modular system you can easily upgrade with a conversion kit.

Made to last with minimal maintenance

Manufactured from machined aluminum with stainless steel couplings, the Sagola 5000X range of filters are incredibly durable.

Options

From pre-filters for moisture separation to coalescing filters to remove particles down to 0.01 microns or active carbon filters for breathing air.

The Sagola 5000X range is available in a number of models to meet the demands of any bodywork.

5000X range filters

5300X Plus Filter

Filter with the same technical and mechanical features as the 5300X model. Prepared for independent use of activated carbon filtering.

Double coalescing filter outlet for painting or blowing. Simple Active Carbon filter outlet for breathing or painted equipment.

Three filtered stages. Sinterised brass 8 microns pre filtration is incorporated, followed by a 0.01 micron Coalescent filter and final filtration by a wide surface active charcoal filter.

Filter life controller

Offer a helpful visual reminder of maintenance programs of our filters. The timer is included in each filter kit.

Timer of **3 months**: Active charcoal filter

Timer of **6 months**: Sinterised brass and Coalescent filter.

The filters have a limited useful life in your filtration equipment. When filters become clogged, equipment performance can decrease. Therefore, we have no guarantee of 100% correct filtering.

When you start using the filter you must press the "ON" button on the device.

SAGOLA®

5000X range filters

5200X Filter

The 5200X model offers the highest technology for air filtering. Two stages of filtering.

Incorporates an 8 micron sinterised brass filter followed by a final 0.01 micron coalescent filter.

Automatic drain system and assisted regulator wheel.

Highly resistant and protective vessels. its draining system reduces maintenance costs due to its greater durability.

It carries out double filtration with optimum flow and pressure regulation, retention of water and impurities achieving an air purity of 99%.

5000X range filters

5100X Filter

Air purifying filter with pressure regulator and pressure gauge.

Its vessel is tougher and more protective.

5100X filter comes with a new draining system which reduces maintenance costs due to its greater durability.

The filtering system retains water and impurities. Incorporates 8 micron sinterised filter.

5050X Filter

The 5050X model is an Purifier Filter with automatic drain system. Ideal for pre-filtering in industrial air lines. Incorporates 8 micron sinterised filter.

Line pre-filter for: medium compressor output (1/2" air inlet), mains level changes, booth input,...

5000X Filter

Purifier Filter with regulator, with a perfect price/quality ratio. Ideal for solvent basecoat paint booths and preparation areas.

The 5000X model features a semi-automatic drain system and dual air outlets.

Filtering system that retains water, oil and other impurities. Incorporates a 20 micron filter.

If you need to upgrade your system from a standard filter to a coalescing system or upgrade to activated carbon, with the Sagola 5000X modular system you can easily upgrade with a conversion pack.

Coalescent filter coupling

Coupling to convert a 5100X to a 5200X filter.

The definitive solution to problems with solid particles. It incorporates a wide surface coalescent filter. Increase of efficiency up to 0.01 microns. Semi-automatic drain system (+ the automatic drain system of 5100X).

Code
56418521

Active charcoal filter coupling

Coupling to convert a 5200X to a 5300X filter.

The best solution to problems of contaminating particles and organic fumes in the air network. It incorporates a wide surface active charcoal cartridge. Semi-automatic drain system (+ 2 drains coming with 5200X).

Code
56418520

Air quality test equipment

Equipment for the detection of air impurities, humidity level and temperature. It incorporates air quality test equipment with inlet regulator, flashlight with magnifying glass of 30 magnification for visualization of impurities, humidity meter and digital temperature.

It incorporates membrane filter kit, pore 0.45µ (50 units).

Pack 6000X Air Heater

The **Sagola Pack 6000X Air Heater** system heats compressed air to a constant working temperature to ensure a stable painting process and a reduction in dew point temperature.

Maximum air quality all year round. Regardless of environmental conditions, the Pack 6000X Air Heater supplies compressed air used in painting processes at a constant temperature, even when there are large temperature differences between day and night, winter and summer.

Heating the compressed air reduces its relative humidity avoiding condensation problems in cold and humid climates.

The use of this equipment provides a finish of optimum surface quality. Maintains a constant temperature in the compressed air, as required for the application of certain types of products.

REGULATIONS:

89/392/CE
2006/95 CE, 2006/42 CS & 2004/108 CE

Easy to use

Light, small and easy to install. The Pack 6000X is equipped with a digital PID temperature controller and a push button LED display with red and green indicators to identify when the selected temperature has been reached.

Cool Touch case

Cold air enters the pressurized chamber cooling the outer casing of the equipment, keeping it isolated from the hot chamber inside, ensuring the Pack 6000X is safe to the touch.

Pack 6000X Air Heater Advantages

• Temperature stability both in the compressed air and the final painting elements such as hose and spray gun.

• Stable painting process in areas with large temperature changes between day and night, winter and summer.

• Constant working temperature.

• Compact and robust.

• Digital temperature display.

• Cold touch, thermal insulation.

• Easy to use; power button and temperature controller.

• Out of the cabin installation.

• Right temperature in the spray gun almost immediately.

Incluye una manguera calefactada aislada para obtener el máximo rendimiento energético.

Heated hose system. Independent of ambient temperature.

The Sagola Pack 6000X is supplied with a specially designed heated antistatic hose to prevent heat loss from the air before it reaches the aircap.

Quality filtering

Effective solution for filtering compressed air in professional paint booths

The **Sagola 4000 air filtration** system is the effective solution for filtering compressed air in professional paint booths for: car repainting, wood, machinery, plastics and industry in general.

In order to choose the filter system we shall install in our shop, we must take into account the type of air compressor we have, its condition and the quality of the air it is supplying.

In case we are looking for a high quality filtration of particles, water and oil, for painting in a booth and to get a good finish, the filter 4120 would be suitable for primers, lacquers, clearcoats and enamels.

To get the highest performance and finishing quality with waterborne paints and High Solid (HS) products, we may need even more pure air that contains no particles at all.

In that case we have to install a coalescent filter and regulator, that is, the 4220. With this filter system we will eliminate any solid particle down to 0.01 microns, water aerosols (C>0.01 mg/m³) and oil aerosols (C>0.01 mg/m³).

Air filters designed and developed for new car painting technologies. Ideal for waterborne and HS paints.

4000 range filters

Maximum air quality

Professional line of air filters and regulators that offers maximum filtration, good performance and resistance, with the best price/quality ratio. The SAGOLA 4000 range removes humidity and oil down to 0.01 microns and ensures minimal air pressure drop (maximum airflow: 1,700 L/min.)

Precision control

Easy to read pressure gauge with double scale, in bar and psi. High-precision regulation system with a large regulation handle. This makes it easy to handle, even with gloved hands.

Reliable and easy to maintain

Made of machined aluminum with an anticorrosive treatment on the entire surface. The 4000 filter range is highly durable and requires minimal maintenance.

Automatic drain system

The combination of automatic drain in the first stage and semi-automatic in the second means that the level of condensate inside the filter is kept at very low levels.

REGULATING WHEEL
air assisted

Partículas
Aceites
Agua

AIR INLET

Centrifugal filtration, separates water and oil through centrifugal force

FILTRO COALESCENTE

Deposition of water, oil and solid particles

AIR OUTLET

Deposition of remaining quantities of solid particles, water and oil > 0.01 microns

AUTOMATIC DRAIN

SEMI-AUTOMATIC DRAIN
Complete 4000 Series Filtration System

Easy and simple to use. Tool-free disassembly.

Automatic drain system. Automatic drain of condensed liquids without manipulation.

High quality, easy to read manometer. Scale in bar and psi.

4220 Plus Filter

Two stage air filter. Maximum filtering level. Recommended for last generation finishes. Waterborne paints, HS clearcoats and enamels, high gloss lacquers.

Highly reliable air regulation system. Regulating wheel for a better fit, even with gloves.

Manufactured from a solid aluminum block. Very robust, but light.

1st Stage. Filtration of water, oil and particles + 2nd Stage Submicron Filtering. 0.01 Microns.

Incorporates automatic purge of condensed liquids. High air flow.

Quality pressure gauge and easy to read.

Plus range filters

Sagola professional range in regulators, air purifiers, and air lubricators. Plus range has been exclusively designed and manufactured for professional use, it gathers high standard in performance and design.

Solid and mecanized aluminium body

We do not use cast parts. Sturdy elements. High durability. Over air paths size offering higher flow and minimum pressure drop.

Anodising treatment against oxidation

Painting to protect elements is avoided. This gives us endless life. Very high resistance to oxidation or other chemical attack.

Easy reading pressure gauge

Double scale bar/psi gauge.

Semi-automatic draining systems

No manual draining.

Regulation handle

Oversized. Easy manipulations, even with gloves.

Policarbonate vessel

High-resistant and high transparency. Does not yellow over time.

REGULATING WHEEL

SEMI-AUTOMATIC DRAIN
The Plus filter range lubrication system offers maximum smoothness of operation, maximum precision. Easy release, automatic pressure drop.

Air assisted regulator and continuous air supply.

Aluminium body. CNC mechanized. Sturdy build. Liquid and impurities holding.

Plus range filters

479 Plus Filter

The most compact solution for the small workshops, industry or priming and preparation areas.

Large air flow, maximum reliability regulating system, high quality pressure gauge, the best materials. Don't undervalue your small painting works or reduce the life of your pneumatic tools by using poor quality regulators and no filtration capacity.

Adaptable to any size of hose. It comes with reducers. Produced from a solid aluminium block, great filtrating capacity with check window for waste particle and semi-automatic drain system, it has everything in a minimum space.

970 Plus Filter

The virtues of the regulator-filter 479+ is now linked to a lubricating element, setting itself apart as specific workshop equipment. It supplies clean, lubricated air to all your pneumatic tools.

Accurate control of the oil content by means of a "drop-by-drop" hand regulator, zero pressure loss thanks to the in-line design, maximum reliability and productivity in the most compact package.

Assure the supply of clean air and properly lubricated to tools and pneumatic engines.

Plus range filters

430 Plus regulator

Mini air regulator. Small, robust, reliable and long lasting. Mechanized from a solid aluminium block.

Diaphragm regulator from 0 to 10 bar. High pressure regulator. Quality pressure gauge up to 10 bar. Double scale bar/psi.

Stand included for assembly on the wall. Standard adaptors and fittings included. Quick release and short shift wheel.

439 Plus Filter

High flow filter for insertion in air lines. Suitable for all type of installations, accessories included. Made of aluminium. High-durability.

Check window for waste liquids. Semi-automatic drain system. Minimum pressure loss.

Minimum maintenance.

437 Plus Lubricator

Ideal for the proper lubrication of pneumatic tools. Multiple inlet and outlet dimensions (1/2", 3/8" and 1/4"). Oil level check window.

Manual oil regulator by level check window, "drop by drop" system. CNC mechanized from a solid aluminium block. Made of aluminium, as the whole Plus range.

SAGOLA
on Elcometer company

Compressed air complements

06

Anti-static hoses, connectors, quick couplings, couplings and seals are elements which complement a good tool with safe, quality work for the painter and panel beater.

The weakest link breaks the chain, we are aware of that here in SAGOLA, and no concessions are made in our accessories range. A safe bet for your professional needs.

Air hoses

Anti-static air hose

Anti-static compressed air hose ideal for painting in the booth. Light, flexible and manageable. Twist free.

EPDM rubber hose with exterior textile reinforcement

High security crimped ends able to bear the high temperatures of the booth. No need to use flanges, avoiding that they release or cause leaks due to dilation.

8 mm. inner diameter. Valid to work with high flow HVLP sprayguns.

1/4" F couplings with conical closure and flare fitting for easy assembly of the push connector.

REGULATIONS:
97/23/CE
UNE EN-559

TECHNICAL DATA — ANTI-STATIC AIR HOSE

Temperature range	-40°C to 120°C	-40°F to 248°F
Maximun working pressure	20 bar	290 psi
Breakage pressure	80 bar	1,160 psi
Material (inside)	EPDM (Ethylene Propylene Diene type M ASTM)	
Material (outside)	Textile reinforcement	Colour Blue
Connections	BSP 1/4" F couplings with conical closure and flare fitting	
Conducting pipe	< 1 M Ω

Quick couplings

Couplings and Connectors

The new range of plugs SAGOLA presents cutting-edge design. SAGOLA offers a wide range that gives cover 100% of market requirements. Is incorporated security versions. All steel and aluminum plugs are BSP; Males (BSPT) and females (BSPP).

Plug body made of treated steel and valve made of brass. So a guaranteed life of more than 1,500,000 uses. The new range of plugs SAGOLA incorporates a handle made of composite, which gives a high resistance to both attrition and drag. Attrition resistance tested in more than 48,000 impacts and the equivalent to a crawl 12 km.
1. **SHOOTER** made of composite with a weight reduction and extraordinary durability against impact.

2. **BODY PLUG** made of steel with anticorrosive treatment.

3. **VALVES** Brass valve manufactured, specific to work at high temperatures.

4. **JOINTS** Nitrile Butadiene. Operating temperature range: -20°C +100°C.

5. **PINS** made of tempered high strength steel that guarantees the absence of attrition.

6. **SPRING** made of stainless steel.

SAGOLA®

General application spray guns

07

Pneumatic tool of essential use in the body shop. Complete and high-quality service.

In this section we offer cord sealant guns, anti-gravel guns for underbody, blow guns and pressure check gun.

3900 Plus sealant guns

3900 Plus M6

3900 Plus M4

3900 Plus

3900 Plus sealant guns

The SAGOLA 3900 Plus pneumatic sealers are a compact, efficient and light solution for everyday needs in any workshop. These pneumatic guns are very useful when it comes to structure assembling, repairs and windshield set-ups, amongst others.

There are two versions: the 3900 Plus for sealants in cartridges and the 3900 Plus M4/6 for sealants in sausages. Both versions include a trigger with discharge valve, which guarantees a great precision and control.

The metallic internal parts assure a long working life. Besides, those parts do not require any manipulation neither any maintenance.

Its body is made of high resistance aluminum. The front part on the 3900 Plus is made of non-deformable plastic.

Very strong product capable to work for long working hours.

Drying systems

08

Most of the repairs in workshops are small and medium bumps, mainly in the front, rear and side parts.

Traditionally cabin room for drying small areas of the bodywork is used and can cause problems bottleneck in situations of great workflow.

Contrary to booths, infrared dryers demonstrate more effective on small areas of the bodywork as they allow the application of heat directly on the treated part.

Super Flow drying gun

Drying gun with Venturi system

Includes venturi regulator to adapt drying technique to the coated surface, retouched area or entire part.

Achieves far superior performance than any other waterborne paints dryer.

Can be fully dismantled to facilitate cleaning and proper maintenance (avoiding pollution).

Thanks to the Venturi system, reduce drying time with an air outlet flow of 6,000 liters per minute.

Larger volume of air outlet for rapid water evaporation.

Exclusive Venturi Regulator.

MP300 breathing mask

MP300 breathing mask

The MP300 mask and A1 filter set has been designed to provide maximum protection against inhalation of organic products with a boiling point over 65°C, without inconveniencing users in any way, enabling them to carry out their work in complete comfort.

The set adapts perfectly to all kinds of expressions and movements, always providing the highest possible level of protection.

The set is made up of a mask and two filters and covers the user's nose, mouth and chin. It is manufactured using light, highly resistant materials that do not have any harmful effects on users' health and hygiene.

The main body of the mask is made from soft natural rubber.

The mask is fitted with an exhaling valve made up of a valve-holder and a membrane, which makes it easier for exhaled air to escape.

It has a comfortable neck strap and head strap that can be easily adjusted to the right length.
