

SAGOLA ®
an Elcometer company

2023

**HARDWARE
AND DECORATION
PROFESSIONAL EQUIPMENT**

For more than **68 years** we have worked hard to be the best at what we do, so you can be the best at what you do.

Since 1955

SAGOLA can trace its origins to the year 1955 and is fruit of the pioneering spirit of its founder, **Alejandro Sánchez Larrauri**.

It began as a small subcontracting workshop for industry. After some years in the subcontracting sector, Larrauri felt the need to manufacture his own product and progressively withdrew from subcontracted activity.

International expansion

Due once again to the entrepreneurial spirit of the SAGOLA team, the need was felt to open the company to the international market. For that reason the Company began operating in related markets such as Latin America, where it soon became the indisputable leader, later expanding to Arab countries, Asia and finally Europe. Today, SAGOLA is present in more than 80 countries worldwide.

SAGOLA has maintained the highest quality standards in the manufacture of its products from its very beginnings, which has contributed to becoming a very important competitor in sectors such as bodyshop and industry.

Elcometer Group

In 2020, SAGOLA has become part of a much larger business group. The ELCOMETER Group. Headquartered in the UK, Elcometer is also a family business and has been owned by the Sellars family for seven generations. Beginning in the 19th century as a chemical company, Elcometer, headquartered in Manchester, UK, has grown into one of the world's leaders in the design, manufacture and supply of equipment for the coating and non-destructive testing industries (END).

Elcometer exports more than 90% of the products it manufactures through its offices in France, Germany, Japan, the Netherlands, Singapore, the United Arab Emirates and the USA and its global distribution network that covers more than 170 countries throughout the world.

Like Sagola, the philosophy of the Elcometer company is to integrate quality into all aspects of the products they design and manufacture, while being very aware of the environment that surrounds us. Elcometer's commitment is reflected in its ISO 9001 and 14001 Quality and Environmental accreditations.

Our History

1955

SAGOLA foundation as a subcontracting company

1960

SAGOLA begins manufacturing spray guns. Launches the Sagola ALM 401

1966

Expansion of SAGOLA facilities

1973

Due to its growth, SAGOLA builds the new facilities

1980

Sagola is a leader in Spain, Arab countries and Latin America

1990

Sagola launches its low-emission solvent products on the market. One of the top three manufacturers worldwide

1999

Sagola launches the 4200 G spray gun

2007

Sagola launches its first interchangeable HVLP air nozzle

2010

Sagola exports to more than 80 countries

2016

Investment in the latest technology and automation of its manufacturing processes. Sagola launches the 4600 Xtreme spray gun

2020

Sagola is part of the Elcometer Group

2022

Sagola launches the new innovation of the 4100 range spray gun.

Sagola Classic Pro XD gravity

The Sagola Classic Pro XD Primer Gun incorporates EPA and HVLP high transfer air caps.

“Metal to metal” technology. No joints or plastic parts in the product area.

Nozzle and needle made of stainless steel.

Matt chrome-plated injected aluminum body.

Maximum ergonomics and comfort.

High transfer in finishes and primers

TECHNICAL DATA

CLASSIC PRO XD

Weight with cup	665 grams	1.47 lbs
Weight without cup	480.8 grams	1.06 lbs
Dimensions with cup	17.9 x 17.7 cm.	7.05 x 6.96 "
Width of handle	1.9 cm.	0,75 "
Air inlet connection	BSP 1/4" Male	
Cup	650 ml. (22 fl oz.) capacity Cup with anti-drip system	
Recommended working pressure	2 bar	29 psi
Materials in contact with the product	Anodized aluminum, chromed aluminum, POM, Stainless steel and Teflon	

Sagola Classic Pro XD gravity

Classic Pro XD aircaps technical data / Versions

21 EPA Aircap. Sagola EPA high transfer technology that combines high transfer rates with high atomization capacity. Low air consumption.

Recommended application	Recommended nozzle	Product output flow	Fan size	Application distance	Code Classic Pro XD
FINISHES	1.40	143 g/min. (5.04 oz/min.)	285 mm. (11.2")		10141620
FINISHES AND PRIMERS	1.60	147 g/min. (5.19 oz/min.)	290 mm. (11.4")	18 - 20 cm. (7 - 7.9")	10141623
FONDS AND PRIMERS	1.80	179 g/min. (6.31 oz/min.)	320 mm. (12.6")		10141625

Air consumption at 2 bar (29 psi):
225 L/min. (7.95 cfm)

Recommended pressure:
1.5 - 2.0 bar (21.7 - 29 psi)

HVLP Aircap. Compliance with the strictest environmental regulations. High Transfer HVLP Technology. High application speed.

Recommended application	Recommended nozzle	Product output flow	Fan size	Application distance	Code Classic Pro XD
FINISHES	1.40	143 g/min. (5.04 oz/min.)	285 mm. (11.2")		10141621
FINISHES AND PRIMERS	1.60	202 g/min. (7.13 oz/min.)	250 mm. (9.8")	12 - 15 cm. (4.7 - 5.9")	10141624
PRIMERS HIGH THICKNESS	1.80	235 g/min. (8.29 oz/min.)	280 mm. (11.2")		10141626
PRIMERS HIGH VISCOSITY	2.50	270 g/min. (9.52 oz/min.)	325 mm. (12.8")		20140831

Air consumption at 2 bar (29 psi):
355 L/min. (11.54 cfm)

Recommended pressure:
1.5 - 2.0 bar (21.7 - 29 psi)

25 & 36 Aircaps. Specially designed for the application of high thickness fillers.
28 Aircap. The best option for the application of gun fillers on large surfaces.
High product flow rates for thick products.

Recommended application	Nozzle	Aircap	Product output flow	Fan size	Application distance	Code Classic Pro XD
PRIMERS HIGH THICKNESS	2.00	25	218 g/min. (7.69 oz/min.)	250 mm. (9.8")		10141627
PRIMERS HIGH VISCOSITY	2.50	36	249 g/min. (8.78 oz/min.)	280 mm. (11.2")	18 - 20 cm. (7 - 7.9")	10141629
GUN FILLER	2.80	28	263 g/min. (9.29 oz/min.)	250 mm. (9.8")		10141630

Air consumption at 2 bar (29 psi):
25 Aircap: 155 L/min. (5.47 cfm)
36 Aircap: 205 L/min. (7.24 cfm)
28 Aircap: 240 L/min. (8.48 cfm)

Recommended pressure:
1.8 - 2.5 bar (26.10 - 36.26 psi)

Classic Lux Gravity

The SAGOLA Classic LUX gun offers one of the best quality/price ratios in its range of conventional primer guns.

With a new body design and improved ergonomics, the Classic LUX spraygun expands the range of responses and application solutions.

Single shaft design. Less number of parts, minimum maintenance. No joints between the air and the paint. One piece packing gland. Internal air distributor.

Nozzles and needles in stainless steel. Air, product and fan flow regulators.

40 AIRCAP
Primers and fillers
Available nozzles:
1.40 / 1.60 / 1.80

41 AIRCAP
Primers and fillers
High thickness
Available nozzles: 2.00

42 AIRCAP
Fillers
High viscosity. Gun fillers.
Available nozzles: 2.50

Cup

650 ml. cup capacity. Includes anti-drip system and paint filter.

Low air consumption

High quality of aircaps, with low air consumption.

Body

Novelty in the chrome of the gun body. Matte chrome.

Nozzle and Needle

Made of stainless steel.

Sagola 3300 GTO suction

Ideal for painting large surfaces, machinery and industrial vehicles

Continuous working days

Versatility. Industrial finishes

With the 3300 GTO suction spraygun, SAGOLA offers a very high level product with an excellent quality / price ratio. This suction spraygun is characterized by its versatility.

High performance spraygun. High speed application for painting large surfaces. Offers large fan sizes.

Ideal for the application of enamels, varnishes, primers and basecoats.

High-end aluminum aircaps. Nozzles and needles made of stainless steel.

Spraygun main news

01 SUPER LIGHT. -METAL TO METAL- TECHNOLOGY.

No sealing joints between components.

02 High strength FORGED ALUMINUM BODY.
REGISTER DC 924667-0004 DESIGN REGISTER.

03 ALUMINUM AIRCAPS.

3300 EPA. Ultra-fine atomization and larger fans. Designed for the best response at any pressure. With mechanized aerodynamic caps which eliminate turbulence and reverse painting.

04 One single piece AUTOMATIC PAINT PACKING GLAND.

Unique in the market. It avoids manipulation and breakage of the glands and makes it easier to remove for the thorough cleaning of the paint area.

05 ERGONOMIC TRIGGER. Made of stainless steel. It reduces fatigue.

06 NOZZLE AND NEEDLE. Made of stainless steel.

07 SINGLE SHAFT SYSTEM.

Directly continuing Xtreme model series with a simplified design, synchronized performance in any kind of situation, fewer parts, and maintenance reduction.

08 HIGH PRECISION AIR INLET REGULATOR. Modern design without sharp edges, it makes easier cleaning. Higher control precision. Ideal for quick adjustment.

09 AIR FLOW REGULATOR with PRESSURE GAUGE.

It maintains the working pressure according to the parameters of Emissions regulations. (Green scale). Code 40000335

10 1L SUCTION DEPOSIT.

made of aluminum. Maximum use of the product. Watertight system with double closure and anti-drip lid.

3300 GTO aircaps technical data / Versions

3300 EPA Aircap. Versatility and perfect adaptation to any type of industrial painting project. High gloss finishes, primers and high viscosity paints. Its sustained air consumption, together with the high percentages of product transfer, make SAGOLA's EPA aircaps the most balanced system on the market.

Recommended application	Recommended nozzle	Aircap	Product output flow	EPA PAINTED SYSTEM		Code Spraygun
				Fan size	Application distance

Air consumption at 2 bar (29 psi): 250 L/min. (8.8 cfm)

Recommended pressure:
2.0 - 2.5 bar (29 - 36 psi)

Sagola Classic PRO suction

Classic PRO suction, Sagola's suction gun with the best quality/price ratio in conventional or medium pressure painting.

Robust and extremely reliable gun. Injected aluminum body.

Aluminum regulators and high transfer nozzles with a spray of the highest quality.

Single shaft system design for fewer maintenance parts. There are no O-rings. Nozzles and needles made of stainless steel. One-piece packing gland.

Large deposit capacity, with double watertight paint closure system and flange closure with gasket and anti-drip lid. The sprung weight reduces fatigue compared to higher deposits.

21 EPA Aircap. High transfer Sagola EPA technology that combines high transfer rates with a high atomization capacity. Low air consumption.

Sagola 472 PRO

There are many other guns that look like or are even true replicas of our 472 PRO Gun, but they are not a SAGOLA.

SAGOLA guarantees the best quality of painting.

SAGOLA guarantees the best quality of its components.

SAGOLA guarantees the best supply of spare parts.

SAGOLA offers you a 3-year guarantee.

This is what a SAGOLA gun offers.

The 472 PRO gun is designed for multi-use applications, always achieving the best quality finish even with highly viscous products.

Internal mix spray system on its two air nozzles. Nozzles with perfect uniformity and fan quality: flat jet and round jet. Ideal for 1 component products.

Easy to use and total portability.

**Flat
JET**

**Round
JET**

Deposit

The capacity of the deposit is 600 ml. Optimized paint zone deposit machining

Low air consumption

The lowest air consumption on the market. 65 L/min.

Air caps

Two types of air caps with a perfect uniformity and quality of fan. Flat fjet and round jet.

Custom box

Air consumption at 2 bar (29 psi):
0.80: 75 L/min. (2.65 cfm)
1.00: 70 L/min. (2.47 cfm)

Recommended pressure:
2.0 bar (29 psi)

Complete painting kit

Complete professional painting kit. Ideal for painting hardware, metal and decoration.

The kit includes a CLASSIC LUX gravity paint gun, version 1.80, nozzle 40. Light and versatile gun, highly reliable.

Inflator - pressure tester CLASSIC I, of high resistance and precision.

Liquid sprayer, CLASSIC P1 oil pump with a 1 L tank capacity. Made of aluminum and with a metal nozzle. Adjustable flow.

CLASSIC S1 blow gun with metal nozzle and body made of aluminum.

Gotele and textured finishes

Special gun for construction and decoration work such as stone, gotelé, projected cork, viscous products in general. It contains a high-quality, 5-liter capacity tank with a handle and a removable lid for easy cleaning.

It incorporates product and air flow regulators.

Non-stick coating on the body of the gun for easy cleaning.

Trigger lock system to facilitate continued use.

Includes a product anti-blocking system. With shut-off valve for air inlet and 4.5, 6 and 8 mm nozzles.

Aircaps / Nozzle and needle kits

The **aircap model** is vital to achieve the desired results. The type of product we are going to apply and the application system we are going to use must both be taken into account when selecting an aircap. We will obtain the desired spray by correctly combining the aircap with the correct nozzle and needle kit, and a proper air supply.

Plus range filters

Sagola professional range in regulators, air purifiers, and air lubricators. Plus range has been exclusively designed and manufactured for professional use, it gathers high standard in performance and design.

Solid and mecanized aluminium body

We do not use cast parts. Sturdy elements. High durability. Over air paths size offering higher flow and minimum pressure drop.

Anodising treatment against oxidation

Painting to protect elements is avoided. This gives us endless life. Very high resistance to oxidation or other chemical attack.

Easy reading pressure gauge

Double scale bar/psi gauge.

Semi-automatic draining systems

No manual draining.

Regulation handle

Oversized. Easy manipulations, even with gloves.

Polycarbonate vessel

High-resistant and high transparency. Does not yellow over time.

The Plus filter range lubrication system offers maximum smoothness of operation, maximum precision. Easy release, automatic pressure drop.

Air assisted regulator and continuous air supply.

Aluminium body. CNC mechanized. Sturdy build. Liquid and impurities holding.

Plus range filters

479 Plus Filter

The most compact solution for the small workshops, industry or priming and preparation areas.

Large air flow, maximum reliability regulating system, high quality pressure gauge, the best materials. Don't undervalue your small painting works or reduce the life of your pneumatic tools by using poor quality regulators and no filtration capacity.

Adaptable to any size of hose. It comes with reducers. Produced from a solid aluminium block, great filtering capacity with check window for waste particle and semi-automatic drain system, it has everything in a minimum space.

970 Plus Filter

The virtues of the regulator-filter 479+ is now linked to a lubricating element, setting itself apart as specific workshop equipment. It supplies clean, lubricated air to all your pneumatic tools.

Accurate control of the oil content by means of a "drop-by-drop" hand regulator, zero pressure loss thanks to the in-line design, maximum reliability and productivity in the most compact package.

Assure the supply of clean air and properly lubricated to tools and pneumatic engines.

Plus range filters

430 Plus regulator

Mini air regulator. Small, robust, reliable and long lasting. Mechanized from a solid aluminium block.

Diaphragm regulator from 0 to 10 bar. High pressure regulator. Quality pressure gauge up to 10 bar. Double scale bar/psi.

Stand included for assembly on the wall. Standard adaptors and fittings included. Quick release and short shift wheel.

439 Plus Filter

High flow filter for insertion in air lines. Suitable for all type of installations, accessories included. Made of aluminium. High-durability.

Check window for waste liquids. Semi-automatic drain system. Minimum pressure loss.

Minimum maintenance.

437 Plus Lubricator

Ideal for the proper lubrication of pneumatic tools. Multiple inlet and outlet dimensions (1/2", 3/8" and 1/4"). Oil level check window.

Manual oil regulator by level check window, "drop by drop" system. CNC mechanized from a solid aluminium block. Made of aluminium, as the whole Plus range.

FR/FRL/RA range

Regulator filter FR

Air purifying filter with pressure regulator and manometer.

High precision regulation manometer. Polycarbonate vessel with high resistance metal protection with a capacity of 30 cm³.

The filtering system retains water and impurities. Filtered water by centrifugation. 40 micron particle filter. Great air flow.

Semi-automatic purge system.

Lubricator Regulator Filter FRL

Compact model that combines the FR range filter system with a lubricator.

Increases the life and optimizes the performance of pneumatic machinery. The FRL 404 model is recommended for tools and motors with high air consumption as well as for the work of several tools at the same time.

Regulator RA

Valid for all types of machinery.

It incorporates high precision and high quality regulation manometer. Constant airflow and pressure.

Air hose

Multi-use hose. Compact with excellent performance and oil resistance. 8 x 15 mm. hose in different lengths and in rolls of 100 meters. Made of Thermorubber with external Polyester reinforcement. 8 mm. inner diameter. Valid to work with high flow HVLP sprayguns.

Working pressure: 20 bar (60 bar of breakage pressure).

Temperature range: de -15°C to 60°C

REGULATIONS:
97/23/CE

Couplings and Connectors

The new range of plugs SAGOLA presents cutting-edge design. SAGOLA offers a wide range that gives cover 100% of market requirements. Is incorporated security versions. All steel and aluminum plugs are BSP; Males (BSPT) and females (BSPP).

Plug body made of treated steel and valve made of brass. So a guaranteed life of more than 1,500,000 uses. The new range of plugs SAGOLA incorporates a handle made of composite, which gives a high resistance to both attrition and drag. Attrition resistance tested in more than 48,000 impacts and the equivalent to a crawl 12 km.

1. **SHOOTER** made of composite with a weight reduction and extraordinary durability against impact.
2. **BODY PLUG** made of steel with anticorrosive treatment.
3. **VALVES** Brass valve manufactured, specific to work at high temperatures.
4. **JOINTS** Nitrile Butadiene. Operating temperature range: -20°C +100°C.
5. **PINS** made of tempered high strength steel that guarantees the absence of attrition.
6. **SPRING** made of stainless steel.

The **XTech line of Airbrushes** has been developed and manufactured under the strictest quality requirements in order to offer a reliable product with a high technical level.

High performance airbrushes. The preferred choice of airbrushing professionals. Airbrushes for automotive, fine arts, bodypaint, tanning, illustration, make-up, model making, confectionery, temporary tattoo - tattoo, textiles, nail decoration...

XTech 500 Airbrush

Sagola XTech 500 airbrush. Dual action professional airbrush and suction feed paint system.

0.3 and 0.5 mm. needle and nozzles, that offer a fine spraying from a high precision to a large spray pattern.

22 ml. suction deposit with fast change system. Ideal for changing color in an instant.

Ideal for projects such as T-shirts, Remote control cars,... In general, larger jobs.

- Needle closing and packing made of Teflon.
- Highly precise and smooth air and product valve.
- Working pressure 15/30 psi 1/2 bar
- Air inlet connection: 1/8" male

3900 Plus sealant guns

3900 Plus M6

3900 Plus M4

3900 Plus

3900 Plus sealant guns

The SAGOLA 3900 Plus pneumatic sealers are a compact, efficient and light solution for everyday needs in any workshop. These pneumatic guns are very useful when it comes to structure assembling, repairs and windshield set-ups, amongst others.

There are two versions: the 3900 Plus for sealants in cartridges and the 3900 Plus M4/6 for sealants in sausages. Both versions include a trigger with discharge valve, which guarantees a great precision and control.

The metallic internal parts assure a long working life. Besides, those parts do not require any manipulation neither any maintenance.

Its body is made of high resistance aluminum. The front part on the 3900 Plus is made of non-deformable plastic.

Very strong product capable to work for long working hours.

Turbo 1000

Turbine Turbo 1000

Autonomous HVLP painting equipment.

The equipment consists of a turbine, a gun and a hose. The gun rests on the turbine in the gun holder. It incorporates a cable collection system. The turbine body includes an accessory holder.

It incorporates two combinations of standard fluid nozzle. The air cap of the gun has four positions to achieve a vertical fan, flat fan or round jet. All of them are adjustable in size.

The generation of painting with hot air allows to work with a low level of dilution in the paints and a faster drying of these.

Painting equipment valid for all types of paints. Finishes, primers, multicolors,...

MP300 breathing mask

MP300 breathing mask

The MP300 mask and A1 filter set has been designed to provide maximum protection against inhalation of organic products with a boiling point over 65°C, without inconveniencing users in any way, enabling them to carry out their work in complete comfort.

The set adapts perfectly to all kinds of expressions and movements, always providing the highest possible level of protection.

The set is made up of a mask and two filters and covers the user's nose, mouth and chin. It is manufactured using light, highly resistant materials that do not have any harmful effects on users' health and hygiene.

The main body of the mask is made from soft natural rubber.

The mask is fitted with an exhaling valve made up of a valve-holder and a membrane, which makes it easier for exhaled air to escape.

It has a comfortable neck strap and head strap that can be easily adjusted to the right length.

Classic MP2 breathing mask

Classic MP2 breathing mask

The Classic MP2 mask and A1 filter set has been designed to provide maximum protection against inhalation of organic products with a boiling point over 65°C, without inconveniencing users in any way, enabling them to carry out their work in complete comfort.

The set adapts perfectly to all kinds of expressions and movements, always providing the highest possible level of protection.

The double air inlet through the two filters allows inhalations of a higher air flow, making breathing easier.

Composed of a mask and two filters, it covers the user's nose, mouth and chin. Manufactured with lightweight and highly resistant materials.

Equipped with an exhalation valve that allows easy expulsion of air when breathing.

Elastic strap for a firm and comfortable fit.

REGULATIONS:

EN 140: 1998, EN 143:2000/A1:2006,
EN 14387:2004/A1:2008
Control agency No. 0082

TECHNICAL DATA

Classic MP2 BREATHING MASK

Breathing resistance	Inhalation:	0.52 mbar
Flujo sinusoidal 25 x 2 L/min:	Exhalation:	1.64 mbar
Breathing resistance	At 30 L/min. (1,06 cfm):	0.11 mbar
Continuous flow inhalation	At 95 L/min. (3,35 cfm):	0.33 mbar
CO ₂ Content (dead space)	0,60 %	
Leaks to inside (tightness)	< 2,00 %

M200/M210 mask FFP2 Protection

M200 and M210 self-filtering paper masks with FFP2 level protection. These masks are designed for protection against solid and liquid particles of low and medium toxicity.

Suitable for use against non-ferrous metal dust, metal welding fumes, gases and mists of different materials such as lead, aluminum and manganese.

The mask body contains a flexible metal bar for a perfect fit in the nose area.

Adjustment to the head by double elastic band.

The M210 mask incorporates an exhalation valve to make breathing easier.

M210 Mask (with valve)	10	40000264

Sanding

Painting

 **The mask can be used in pollution concentrations up to 10 times the Occupational Exposure Limit (OEL).**

Consumables

Paper paint-strainers

Paper paint-strainers for fast and perfect filtering of the paint.
Paper paint-strainers with 125 or 190 microns Nylon mesh.
To obtain a quick filtering and a surface without speckles.
Supplied in plastic bag to keep them always clean.

VERSIONS
